

Within-group variability of theoretical explanations (Humans vs GenAI)

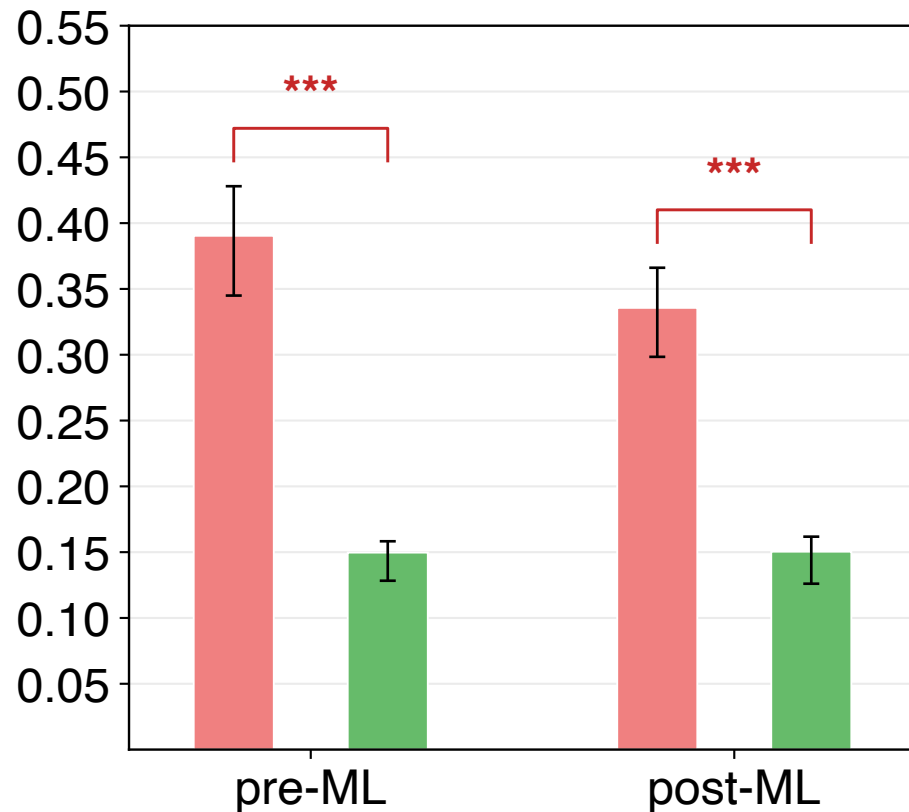

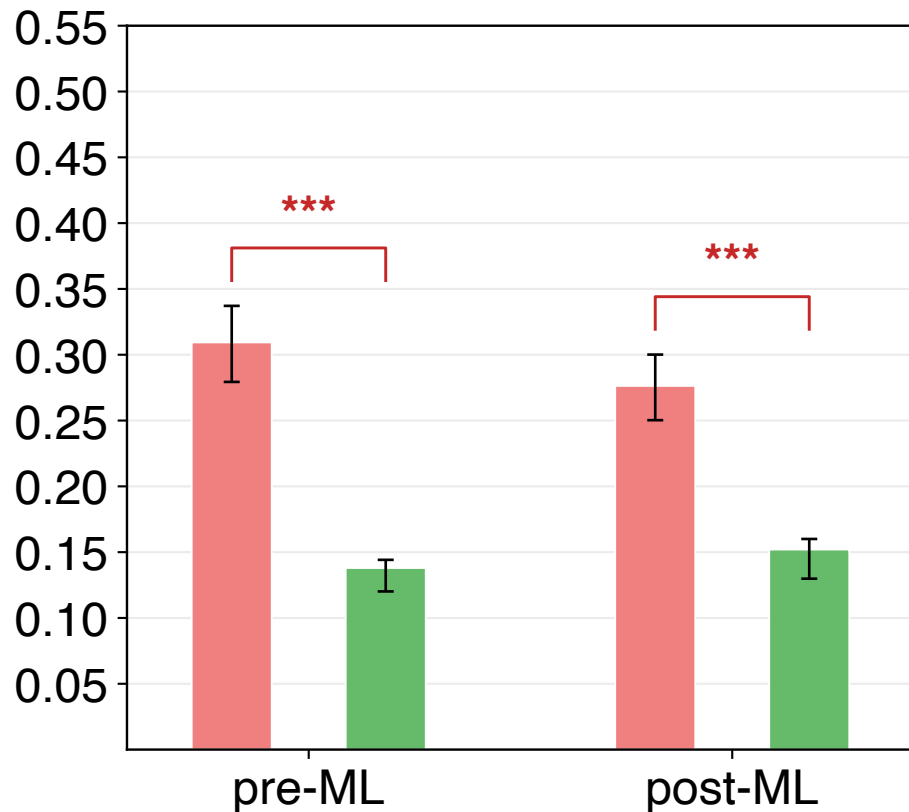

Metric: mean pairwise cosine distance among group members, higher = more dispersed

Race · Main Effects

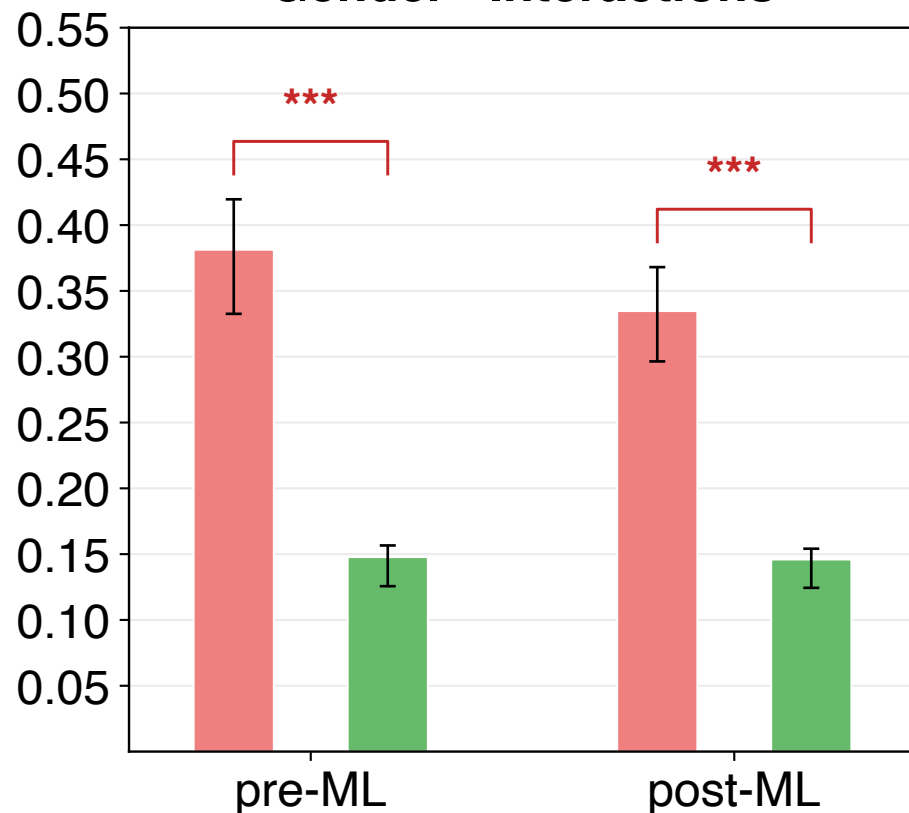

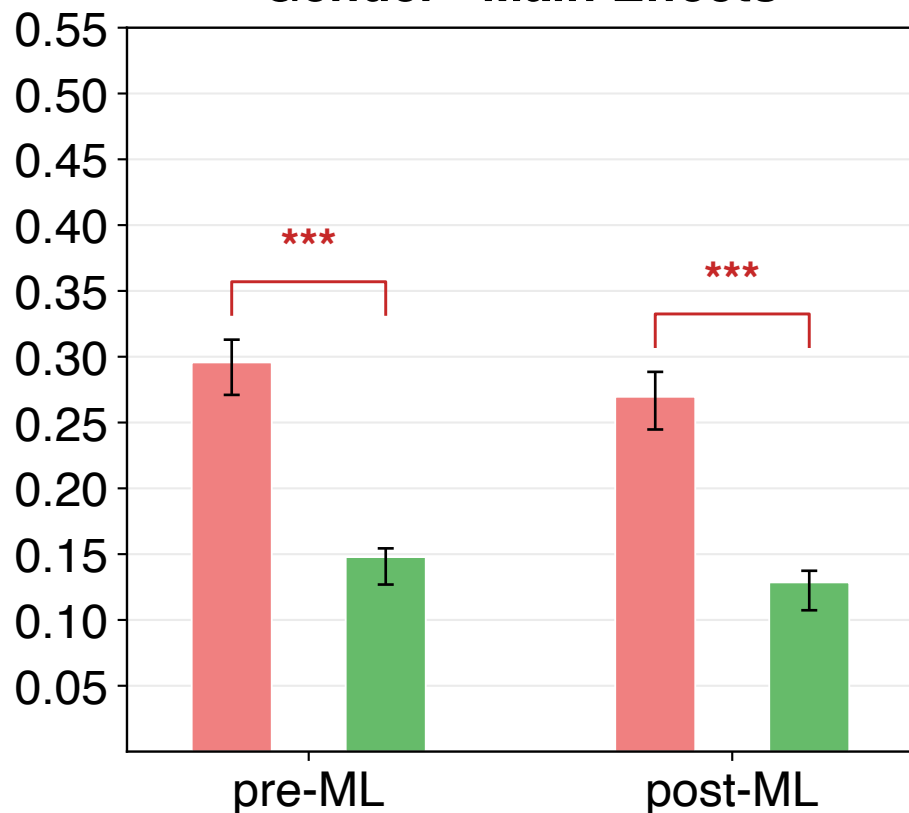

Race · Interactions

Mean pairwise cosine distance

Gender · Main Effects

Gender · Interactions

Error bars: bootstrap 95% CI.

One-sided permutation test on group mean pairwise distance (directional: Humans > GenAI).
NS ($p \geq 0.05$), * ($p < 0.05$), ** ($p < 0.01$), *** ($p < 0.001$)
